

James Limborg Experiences

07/24/2020 - Approximately 6+ years ago I did a search on YouTube for 'psychic' which led me to 'psychic mediums' which led me to many psychic mediums including Theresa Caputo (Long Island Medium), Kim Russo (The Haunting Of, TV show), Matt Fraser, Monica The Medium, Jeffrey Wands, Tyler Henry (Hollywood Medium), Maureen Hancock, Lisa Williams, and many others. After watching many videos I saw the evidence that I needed to believe that some psychic mediums can really communicate with spirits and aliens/extraterrestrials. Then I started listening to what those spirits and aliens had to say through psychic mediums and people who channel spirits/aliens. Here is 6+ years of information that I have collected on psychic mediums, astral projection and near death out of body experiences, aliens/extraterrestrials, and other spiritual information:

Meditation Experiences:

- About 2 weeks after starting to meditate [sitting in my closet in the dark about 10+ minutes each day, clearing my mind] I started feeling energy move in my body; Mostly in my upper legs and stomach areas; At first it felt like two little dogs walking on my bed pushing the bed up and down softly; Most of the time it feels like swirling motions.

Some Visions I Have Experienced:

About 2 weeks after starting to meditate I also started seeing visions. When I lay down to rest my room is about 90% dark; After I rest for a while sometimes I will see a vision immediately when I open my eyes and that vision will fade away in about 2 to 5 seconds. Below are some of my vision experiences:

- My first vision was a spider with 12-inch long legs walking across the ceiling [It scared me and I jumped up and turned the light on].
- I saw a smaller (a tarantula sized) spider walking in front of my vision as I was laying on my side; It walked along the edge of my bed; I grabbed my hand through it.
- I saw (what looked like) a 4-inch round cob-web ball slowly falling.

- I saw a white rectangle above me that would start out flat and then slowly fall like it was made of smoke; I saw that a few times.
- I saw what looked like a baby wrapped up in a blanket above me; I couldn't see a baby; The face of the baby would have been facing the ceiling; I was looking at the underside.
- I saw a 2 inch square insect that looked like mix between a bee and a fly; I saw that twice (two separate nights).
- I was lying on my side with my arm and hand out and when I opened my eyes I saw an original brown glass whiskey bottle upside-down with the 1-inch round neck of the bottle inside my hand [After reading this... I think Erik Medhus did that to tease me, as a joke; He's a trickster; Erik Medhus at Channeling Erik youtube-channel].
- I saw a Z fold menu, tall rectangular shaped with a picture of a piece of pie on the front; As I lifted my head and leaned to the side to see if it was an actual piece of pie the image disappeared; And when I brought my head back I could see it again; This tells me the image was 2-dimensional.
- Newspaper folded in half with the number 4 written on it big.
- Red lines that were all connected (as if they were written with a red ink pen, but the lines were glowing red) and the lines formed a bunch of squares and some circles.
- Two black cubes with colorful (yellow, blue, red) tall narrow windows with rounded corners and staggered vertically (in the same pattern a brick wall is arranged but vertical) with black in-between each window; The two black cubes were merged together at two corners [one corner from one cube was merged into one corner from the other cube; They were merged about 33% into each other]. It floated slowly like an alien spaceship.
- Around March of 2018 while sleeping I got up and went to the bathroom; Standing there with my eyes closed I saw individual grains turn into larger granular energy which then turned into a vision of water swirling around with white bubbles/foam as if my eyes were really close to the surface of the water/stream; It was 100% vivid/real. I never had a vision like that before with my eyes closed while awake.
- May of 2018 I had a similar experience to the above experience with the swirling water, but this time while standing in the bathroom with my head against the wall and my eyes closed I saw ocean waves like I was about 1 mile up in the sky looking down at the ocean and bent and curvy lines going from me all the way down to the ocean and the lines were all

dancing/moving perfectly together; This visions was only about 50% real/vivid/transparent.

My Manifestation Experiences:

To manifest things in your life you must be 'in the now' while you say and feel what it is you want to manifest; Example: "I am grateful for the abundance of money, love, joy, happiness, gratitude, knowledge that I have in my life now." Along with saying that you must feel as though you already have those things you want to manifest.

- I won a \$10.00 Amazon Gift Card through Publishers Clearing House.
- I manifested a La-Z-Boy executive office chair made with real (genuine) top-grain leather and red mahogany wood for only \$310.64 [Most genuine leather chairs cost \$600.00 or more]. I was in need of a new office chair and asked the spirit world to please make available a real leather office chair with mahogany wood available for around \$300.00. About 1 to 2 months later I found this chair available at COSTCO and bought it; About a month later that chair was off COSTCO's website.
- I asked my master spirit team to please make a meeting not last the 2 hours they said it would; The guy announces to everyone that there is good news; The meeting will not last 2 hours, it will last 45 minutes instead. This happened 9-7-2018.
- Around the year 2015 I set an intention when I laid down to sleep by asking my sub-conscious to please wake me up when I fall asleep so I could try astral projecting; That's exactly what happened; I all of a sudden discovered I was awake which was a very strange experience; It's like wondering what's going on and then realize oh yes I was sleeping; And then I remembered setting that intention. I never had an experience like that before and I found it very unique.
- 12-24-2018 I went to Perkins restaurant around 1:30am and I told God and Jesus to be with me and we would celebrate Jesus' birthday while I eat my pancakes; I joked with Jesus saying maybe I could perform a miracle for everyone there saying maybe I could manifest a free pancake or a free meal; When I went to the front desk to pay I had to sit and wait for the man to serve a large family food; When he finally came to me he said, "The meal is on me". I've been to Perkins restaurant many times throughout my life and never remember getting a

free meal and here I get one tonight; I consider it a gift from God and Jesus indeed... indeed.

- 8/12/2021 around 8:00 PM – Most days for the past 7 months I have been walking around Spooner Park and Gervais Mill Park. There are two areas to play the Bocce Ball game but no one is ever there playing; So today I set an intention by saying “I Am Word through the intention that people will start playing Bocce Ball there; I Am Word through this intention; Word I Am Word.” About 30-minutes after setting that intention while on my way back from my 2 mile walk I saw 3 people playing on those Bocce Ball areas; I went up to those people and I said, “You are part of my miracle; I’ve been walking here most days the past several months and no one ever plays here; So I asked the Spirit World to get people playing here and here you are. What is this game?” and they said Bocce Ball.

My Spirit-Energy Related Experiences:

- I asked spirit to make the ducks in the pond come up in my yard sometime; The next day two ducks were standing on top of my clothes line pole; The pole is about 2-inches round; In 13 years I’ve never seen ducks stand on that pole. They also stood on my parents shed.

- I was working on my deck and I heard a flutter sound; 3 minutes later I heard a tapping sound on my roof; It was a pigeon with a tagged leg. I’ve never seen a pigeon in my whole life here in Minnesota [I am 46 years old]. I felt this was a sign from my deceased loved ones saying hi, we are here with you, helping you with your house; I asked spirit many times to help us with fixing up our house before this happened.

- While driving to Mystic Lake Casino to eat at their buffet I asked the spirit world to please see if you could have the prime rib nice and red. I got there and their prime rib was all brown (well done); BUT... Behind it was one nice and red piece; I asked if I could have that one piece and he said it’s the only piece left.

- Another time I went to Mystic Lake Casino for their buffet I asked spirit if they could make sure the prime rib was nice and red; I got there and they had 2 really large prime rib roasts sitting out perfectly red from center to the edges; I haven’t had prime rib that good in over 20 years. THEN... When I went to get desert, I saw the crepes were still in caramel sauce [About a week before I sent an email to Mystic Lake Casino to please keep the crepes separate from the caramel sauce and to supply

maple syrup so I could put that on the crepes instead]; The woman behind the counter tossed out 3 new crepes on top of the caramel sauce; I was able to grab the crepes before she covered them in caramel. I took that as a big sign from spirit; They helped me get some crepes without the caramel sauce on them. THEN... As I was walking towards my car I saw a falling star above and in front of my car; And when I got home and looked out my back window I saw ANOTHER falling star after asking the spirit world to please show me something in the sky (alien ship, something).

- I told Erik Medhus that if I see a cloud in the sky shaped like an E I would know it was him that created that; And if he made me look at a license plate that started with an E it would be him making me notice the license plate. I looked out my parent's bedroom window at the sky and said "Erik, I don't see any E's in the sky today" [the sky was a solid gray color, really cloudy] and then I saw an Eagle fly towards me; So the E in the sky was an Eagle. I think Erik did this.

- 8/3/2018 I went to Perkins with my tennis-friend Dan around 9:00pm; In front of me to my left I see my cousin from Chicago being seated with my other cousins.

- 8/3/2018 My mom went to St. John's hospital to have a kidney stone removed and the room they placed her in [Room #213] was right across the hallway from room #222 where her dad [my Grandpa Rudy] died.

- 11/4/2018 – About a week ago when I laid down to sleep, my eyes were closed and I saw a faint white light, it came into my head and I felt a strong energetic experience that lasted for about 5 seconds only; That was it; It was an intense experience; While that was happening I said "Thank you" like I was filled with Love or an informational download of some-kind [I don't know; It just felt energetic/electric].

- 8/13/2020 I went out to dinner with my parents to Perkins restaurant and we were seated at a table with a small pot with two succulent plants in it. No other table in the restaurant had plants. Recently I bought my mom a succulent plant for her Birthday, and before that for Mother's Day. Spirit sat us at that table to see that plant I believe [As a way to say we see what you are doing, we are with you, etc.]. And then... On 8/15/2020 my parents and I were seated at the very same table with that same plant. 90% of the tables were empty and they could have seated us at those tables instead. The last time we were there... when my parents ordered their food the waitress said "Wait, I need to go check if we still have that available". And this time a

different waitress also said the same thing. Both times the waitresses said "Yes, that is still available." My mom said if the second waitress comes back saying what they ordered is still available [like the other waitress said the last time we were there] then she would believe it's not a coincidence.

My Alien/UFO Experiences [Location: Roseville, Minnesota]

- Summer of 2016 I was on my back deck and I looked up at the stars and said, "If there are any aliens up there blink a light 3 times really slow and bright." That's EXACTLY what I saw; 3 blinks to the north nice and slow and bright. It looked like it came from where satellites would be (about that high up) and the brightness was as bright as the brightest star. The next day I ask the same thing and AGAIN I saw 3 blinks in the sky but this time to the East.

- 06/06/2019 – Around 3:10am I was outside on my back deck looking at the stars; I talked really quiet saying, "If there are any aliens up there please show me your space ship; Do something." To the East moving from South to North I saw a moving object light up for two seconds; I said, "Thank you; Please do it again." About 1 minute later I saw the same thing this time North-East moving in the same direction. It was like what people who see UFO's call a Power-Up but very short as if they only wanted me to see them. The object appeared to be about 1 mile away from me; The light went from complete darkness to brightness, fading-in from small to large and fading-out from large to small; Hold your thumb and index-finger ¼-inch apart and then hold your fingers against the sky and imagine a bright-light about 1 mile away at that size [That's about how large the light was at its brightest]; And the shape of the light was more oval shaped being wider on the left and right sides.

- 06/08/2019 – Around 2:50am I was on my deck looking at the stars asking the aliens to please show me something; I turned south-east and noticed 2 bright stars, one on top of the other; I thought to myself, where the heck did those 2 stars come from? I never saw those stars there before; Every night the same stars are in the sky; I stared at those 2 stars for about 15 seconds and then they both slowly faded away together in about 15 seconds; A cloud would cover one first and then the other; These both faded away together. 06/09/2019 I looked at the sky all night from 12am to 3am and I never saw those 2 bright stars to the

South; That confirms to me my experience yesterday was aliens that created those 2 bright stars to the South.

- 06/27/2019 – Around 2:25am I was laying on my reclining chair looking at the stars and said “Show me something aliens” and eventually I saw a light moving from South to North looking over my house towards the North; I think it was a dim Power Up that lasted only 4 seconds; It appears to be the same object I saw 06/06/2019 at 3:10am that did a Power Up.

- 07/03/2019 around 1:00am I was outside on my deck laying back in my chair looking at the stars; Within 5 minutes I saw something moving from North to South and light up for about 3 seconds; It was up where satellites are; The light wasn't super bright, just bright enough for me to see clearly; The last time I was out there I asked my alien friends to please show me something moving from North to South because the last 3 times I saw things moving from South to North; This confirms to me something is listening to me up there. About 5 days ago I saw the same object moving from South to North and it lit up [a light] 3 separate times just 2 seconds each time and in a row and that was it; That's when I realized the last 3 times I saw something up there they are always going South to North and asked them to please do something from North to South next time [and that is what I saw tonight].

- 07/03/2019 around 3:00am - I had another experience; I went out around 3am and looked at the stars for 10 minutes; I went in and got my laser; I shot my laser up in the sky for 3 seconds a little East and then said... ok aliens, I put on a show for you; Now you put on a show for me; Within 1 minute I saw a blinking light START where I shined my laser for 3 seconds and the blinking light went North; I stood up out of my chair and looked over my roof and it blinked a few more times and then stopped, nothing more.

- 07/04/2019 around 4:00am I asked the aliens to show me something and soon after straight above my head as I was laying back in my chair looking at the stars I saw a quick bright flash of light and that was it; Nothing more; I said Thank You, I saw that; The flash of light was 1/8-inch round and appeared to be about a mile or so in the sky.

- 07/05/2019 around 3:30am I had just sat down to look at the stars and within 2 minutes looking South I saw an object do two slow flashes of light and that was it; I felt like it was my alien friends saying hi to me; It was not fireworks; Super quiet, warm, and clear sky.

- 7/18/2019 around 12:45am I was looking at the stars laying back in my chair and I said "Aliens show me something please"; I saw 3 bright blinks way up in the sky slowly moving from North to South. They answered me within a minute.
- 7/22/2019 around 12:50am looking at the stars asking my alien friends to show me something; About 3 minutes after that I saw a light moving across the sky from North-East to South-West and then faded away during flight; It was about twice the size of a star, solid white light. Clearly not a satellite because it faded out completely above me to the right [South a little].
- 7/23/2019 around 12:30am I shine my green laser into the sky for 3 seconds and say "Ok alien friends show me something"; About 3 minutes later I see a white light moving across the sky from North-West to South-East and then fades away not too long after it passes over me. Around 4:00am I shined my green laser in the sky for a few seconds, waited, about 3 minutes after saw a light appear above and to the North-East as it was moving and then fade away within about 4 seconds; 2 minutes later it did it again.
- 7/24/2019 around 1:00am I was laying down on my chair looking at the stars; I said, "Aliens, bring your ship down here"; Within about 3 minutes I saw a detailed light flying from South to North only about 500 feet above me; It was like a ripple of light, three u-shaped lights similar to this: (((flying above me. Then immediately after I see a light moving across the sky way up high like a satellite from North to South and it seemed to make a little curve as it was flying; As it passed over me it went a little further and then faded away completely [That lets me know it was not a satellite]; And as that light was moving the other light that was only 500 feet above me flew by again from North to South but this time dimmer.
- 7/25/2019 around 3:50am I was laying on my chair looking at the stars, I looked South and saw an airplane flying from South-East to North-West about the size of an inch with solid and blinking lights; Then, much lower moving from South to North a random blinking bright white light went over me and seemed to go higher as it went North and seemed to fade out; Then 4 minutes later it came back from North to South blinking randomly a bright white light as it went South; I sat there another 20 minutes and didn't see anything more. About 20 minutes after that I saw what looked like a falling star but I don't think it was

because it was right above me falling from West to East like a firework and it appeared to start at that point.

- 7/30/2019 around 4:00am I was looking at the stars [a cool night wrapped in a wool blanket] and I said "Come on alien friends, put on a show for me" and I saw a light [tiny like a star/satellite] moving above and in front of me from West to East a short distance and then faded out; Then I said "Come down here close to me about 50 feet"; Shortly after I saw a stream of light fly by from south to north in front of me; Then I said "Now come 10 feet from me"; Then I saw a light at the top corner of my house above my sliding glass door light up dimly and moved to get my attention making me look; I definitely know something is communicating with me [an alien, a light being, something].

- 8/1/2019 around 2:10am laying on my chair in a wool blanket on a cool night I was talking to the aliens asking them to take me to Hawaii and then above me flying fast from East to West at the top of a tall tree in my yard about 150 feet up a very intense about 8-inches wide yellow and green light smeared across the sky [Yellow in the middle with green on the outside edges]; The color was so intense against the night sky it reminded me of colored posters that glow with a black ultraviolet light.

- 8/7/2019 around 3:30am; I haven't had any alien/ufo experiences the past 3 or so times I've been outside looking at the stars; Tonight I said "If there are any high vibration/frequency aliens that can hear me and your intent is for my highest good and will help me raise my vibration/frequency show yourself to me now please"; And I saw a stream of light fly by me about 40 feet up just over the roof of my house moving from south to north [Like if you took an almost white red-hot piece of coal/wood and through it through the air and it flew at a straight line horizontal to the ground; It was mostly white but with a little red].

- 9/2/2019 A few days ago my parents saw their first UFO around 11:45pm; My mom was looking out her bedroom window and saw a square object hovering about 300 feet off the ground above the trees to the North-West; She made my dad come see it as well; It had multi-colored lights on the bottom; Then it slowly started to move; Then a bright white light flashed ON; And then it moved out of view. Around 1:30am that same night my mom said she saw a round white circle to the North that looked the same as the moon looks in the day; She made my dad get up to look at it as well.

- My dad got to see one of my star friends at around 10:05pm, Tuesday, 4/7/2020. Around 9:30pm I went outside on my deck and laid

on my reclining chair with a wool blanket. I always say quietly, "Come on alien friends, star friends show me something up there please." Nothing happened. Then I shined my 5mW [5 mega-watt] green laser at one point in the sky for about 5 seconds and then turned it off like fishing. Then I waited. That seems to draw them in. About 3 to 5 minutes after that I started seeing my alien/star friends. They look like stars moving across the sky. A light turns on, moves across the sky a little bit, and then slowly turns off the light. In the same spot, about 5 times, a light turned on, moved across the sky, then turned off, then another what appeared as a new light turned on, faded across the sky in the same path and turned off; 5 times that happened. So I went inside and called my dad on the phone to come see this. He got out on his deck next to my deck in about 5 minutes. Then I said "Show yourself again, my dad is out here." About 2 minutes later a very bright star like object moved from south to north above our houses, I pointed next to it using my green laser so my dad could see; He was in pain because his back has been hurting him, but he said he saw it. It faded out completely. It was very bright at first and completely faded out while moving from south to north. This was my first 2020 ufo/alien experience.

- 4-18-2020 around 9:30pm neighbors Mike and Janet and I all saw a light moving across the sky from south-west to north-east similar to a satellite but then after it goes by another one would come. This happened 5 times or more on 4/7/2020 and another 5 times or so when standing in my driveway looking at the stars with my neighbors. Then I laid in my reclining chair on my deck and it happened another 10 times or so and saw 2 of the headed in the same direction but they were pretty far apart from one another. I said "Come down here alien friends" and saw a light turn ON to the East and then OFF. I said THANK YOU. Then about 10 minutes later a light about 250 feet above the pond in my back yard from East to West fell like a falling star effect. My neighbors were outside because they said someone told them to go outside and look at the lights in the sky [ufo's].

- Around 10:15pm 4/26/2020 laying back on my reclining chair on my deck I saw the fastest light going across the sky that I ever have seen so far. It was moving from West to East looking over my roof while laying on my reclining chair. I said THANK YOU and then the light slowly faded out before the object went out of view. Usually objects/lights will continue moving until out of view. They purposely turn their lights off BEFORE going out of view with me. And then... about 15 minutes after

that I saw a huge flash of light in the sky north-east [Imagine those fireworks that create a FLASH of light with a big BOOM!!! I saw that but without the big boom sound]. They've done that before for me last summer.

- About 3:40am 4/27/2020 I had one of my favorite alien/ufo experiences. I was laying back in my reclining deck chair looking at the stars waiting to see if my alien/star friends show me anything. And then where I was looking, in front and up I saw a light moving from south-west to north-east really dim but I could see it. I said THANK YOU. And then BAM... a bright light flashed to my left, much closer to the ground. I looked in that direction hoping to see another flash... nothing, and then BAM another flash of light I saw clearly... and then the light faded in slowly, out slowly as it was moving from west to east... and then BAM!!! a super bright light with sharp edges [the light seemed to have detail, like lines coming out in all directions], and then it went back to fading in and out as it moved East until it went out of view. Meanwhile, that first light I saw kept appearing in the same place and then moving from south-west to north-east, and when it went out of view it would repeat again starting in the same place like it circled around and followed the same path. It did that 7 or so times. This was one of my favorite experiences tonight. So cool, amazing, awesome!!!

- 5/9/2020 around 3:30am I saw a small flash of light to the East, the a little North-East, and again. I said "Come down here." Then to my right [south] about 20 feet from me, about 30 feet from the ground, flying mostly horizontal with a little downward angle was a light that looked like a red hot piece of coal with a trail behind it [It looked like a mixture of black, orange, yellow like how red hot embers/ashes look].

- 7/1/2020 around 3:20am - My alien friends haven't been showing themselves to me at all recently the past few weeks I've been outside looking at the stars... BUT TONIGHT they did. The floor of my deck had some wet paint so I went out on my front lawn and laid back in my reclining porch chair with a 100% wool blanket wrapped around me to keep any mosquitos off of me. I could see a lot more stars in my front yard versus on my deck. I said "Come on alien friends please show me something." Shortly after I saw what looked like a satellite moving across the sky above and a little behind me. I said "If you are my alien friend flash a light or shine a light so I know you are not a satellite." Nothing happened so I started looking in another direction. Then I looked back where that satellite was and it was a very large bright white

light floating in the sky. I said "Thank you, I see you" and then the light slowly faded back to the satellite brightness. That was amazing. I never had that happen where something that looks like a satellite turns into a very bright light, brighter than what they normally show me. Super cool experience tonight.

- 7/3/2020 around 3:00am - I went out on my deck to see if my alien friends would show me something. I laid back in my reclining deck chair wrapped up in a 100% wool blanket to keep mosquitos off of me. I said "Show me something alien friends". I first saw some blinks in front of me about 10 feet away like light-up bugs, but it could have been much-further away in the sky above the pine trees. Then on my left side a flash of light caught my attention so I started looking there. Eventually another flash of light but more to the right of the first one. And again soon after further right again. As it was moving it would turn ON then OFF [fade in, fade out] quickly like a slow-flash of light. And then it did what I asked a few days ago... which was to change direction please... because whenever I see these lights they are always going in the same direction. Tonight was the first time I saw a moving light change direction. The light was moving East, but then changed and was heading North as it faded in and out slowly [a slow flash of light]. I said "Thank you... I see you changed direction. Thank you for doing that for me." Then I said "Do something 4th of July like... a falling star effect with varieties of colors if you can." Soon after saying that a light faded in then out as it was flying at my right side fast and about 100 feet or so away from me coming slightly downward, wizzing by. I said "Thank you." And then the last thing I saw was a very bright light, like how a helicopter with a light on would look, moving like a satellite, but it was too bright and low for a satellite and there was no sound as it went from mostly West to East, slightly South to North.

- My friend Derek Goga had his first alien/ufo experience July of 2020. He said, "I was riding my bike@3:30am I looked up and saw this light flash on and off and watched it do a circle then it just took off it was crazy to see it but I know it wasn't man made."

- 7/24/2020 around 3:00AM I was laying in my reclining deck chair looking at the stars. There were some clouds but I could see the stars between the clouds. I said "Alien friends, Where are you up there?" About 15 minutes being outside I saw a light that looked like a bright star, about 1000 feet above me shoot across the sky, horizontal to the ground, about the speed of a falling star, from south to north, a little bit west to

east as well, and after it passed over me it faded out. So it was like a very low falling star that didn't fall, went horizontal, and it was so crystal clear because it was so low, really close to me.

- 8/5/2020 around 2:10AM – I have had many alien/ufo sightings in the sky that I do not type here because they are very similar to what I have already experienced. My internet wasn't working so I went on my deck and laid back in my reclining deck chair wrapped up in my 100% wool blanket looking at the stars. Eventually I saw 2 objects to the East moving from North to South, both objects were fading in and fading out light as they were moving, the object in front was sometimes FLASHING a light at me. That's the first time seeing 2 objects do that together. I believe they were space ships.

- 8/5/2020 at 9:35PM – Pulled my car into the garage, checked my mail, stood at the end of my driveway looking at the stars above me saying "Alien Friends, How come you never show me anything when I am standing here?" and shortly after I saw a FLASH of light South looking over my house, another FLASH of light way down to the left. Both flashed their lights at me 2 or 3 more times. I said "Thank you." This is the first time I've seen something when NOT on my deck looking at the stars.

- 8/19/2020 around 11:15PM – For the first time I have a solid WITNESS [pun intended] seeing my alien friends FLASH a light in the sky twice [about 10 seconds apart] and then again about 10 minutes later. My friend Drew who is a Jehovah's Witness had this experience with me. We were out on his deck looking at the stars, I asked him several times... "Are you okay with seeing aliens/ufos in the sky" and he would not answer yes or no to that question; But he did say "I never said aliens didn't exist". Soon after I said "Alien friends, Please show Drew and I something right out there above the trees where we are looking". I told Drew I will sometimes see a FLASH of light. About 5 or so minutes we BOTH saw a FLASH of light, and then again about 10 seconds after. The light appeared to be about a mile away above Medicine Lake in Plymouth, Minnesota. Drew was shocked; Because 3 times he repeated himself to me saying "I never saw that before. And that was bright." I said I know... this is the 3rd time telling me that hahahahhaa. I was so happy someone saw that WITH ME. Someone I have been friends with for 40 years but tonight was the first time I visited him in about 6+ years. Coming home I saw a suspicious object with lights move across the 694 highway, and 5 minutes after hovering by a 1500 foot tall antenna tower

[Could have been a helicopter. It was very triangle space ship looking just hovering at low altitude, 700 feet up or something].

- 3/12/2021 around 4:50AM – I laid in my reclining deck chair and said “Alien friends, If you are up there show me something please” and within 5 minutes I saw a light moving above me to the left, moving from North to South. I said “Oh I see you, Thank you for coming” and the light got much brighter then dimmer then brighter again and then the light got really dim but could still see it moving as it went over the tree above me. Then about 10 minutes later to the East I saw a big flash of light. I said “Thank you. I saw that.” I stayed out for another 15 minutes but didn’t see anything else.
- 4/6/2021 around 5:00 AM My alien friends showed themselves to me flying from North-West to South-East really dim; I flashed my 5mW green laser in front of it 3 times to play with it. A couple times it got much brighter.
- 6/1/2021 at 4:37 AM I saw a light turn ON above me, I said “Hi, I see you. Thank you for showing me something” and then after it faded out another light turned ON in front of the first light and I said “Wow 2 of you are up there. Thank you for showing me something. I miss seeing you.” About 5 minutes before that I said “Alien friends where are you.”
- 6/6/2021 around 2:20 AM – Clear night, laying back in my reclining chair on my deck looking at the stars; I said “Alien friends, Where are you?” and a few times they flew over sometimes fading in and out their light. Then I asked “Show me a falling star effect but go horizontal and break apart like sparks.” After about 15 minutes I saw a stream of light [like a falling star] about 400 feet up, moving horizontal from East to West mostly [also moving a little bit South to North as well] and it left a black smoke trail. It didn’t do the sparks like I asked but I was still grateful. Soon after I saw a light moving across the sky way up where satellites would be and it was FLASHING a light at me sometimes as it was moving from South to North above me.
- 6/8/2021 around 11:20 PM – I saw what would make most people BLOW THEIR MINDS. It blew my mind and I’ve seen a lot of alien/ufo sightings here. About 150 to 200 feet up starting in front of me [East] a light FLEW OVER ME about 500mph. I was looking to the North at another alien friend blinking a light at me way up where satellites would be; And then that light flew over me; I saw it threw the tree branches above me as it was leaving. I asked it to do it again but it did not. Before this happened I said “Alien friends, Where are you; Show me

something." and a few times I saw lights moving way up where satellites would be; Two of those lights moving faded in and out with light [That's how I know they are my alien friends and not satellites]; One of them FLASHED a light at me several times as it moved south to north over my house across most of the sky.

- 6/23/2021 around 2:45 AM – I asked my alien friends to show me something amazing. I saw what I thought was a StarLink satellite moving across the sky [Moving South-West to North-East]; I said quietly outloud "I think that's a StarLink satellite." And then it started getting brighter; AND THEN... It got REALLY BRIGHT, brighter than I ever seen my alien friends get [Brighter than any Power-Up I've seen in Youtube videos. It was like 5-times brighter than the brightest star]. It BLEW MY MIND it was so bright. Yesterday a stream of light flew really fast between a large opening in the clouds. Every night I've been seeing my alien friends doing things in the sky [Usually fading in and out with light and FLASHING a light at me one to three times].

- 7/13/2021 - Just a moment ago [around 4:20 AM] my alien friends flew across the sky pretty fast. I looked to my left [North] over my roof and saw them coming. It looked like a very bright star moving, maybe 1 mile up or so. It was moving much-faster than they usually do. Then it started to fade-out when I was looking at it in front of me [East], and then it faded-out completely... and then... it FLASHED a light at me about 5 seconds after it faded-out completely. The past several nights they have showed me many things [Flashes of light, fading in and out with light as it is moving, a falling-star effect just 150 to 500 feet in front of me]. Yesterday a light blinked [a dim flash] about 15 to 20 times [about 3 seconds between each blink] and then right when it stopped blinking... I think it flew from there to behind me and then flew over me and turned it's light ON as it was moving really fast creating a falling-star effect about 500 feet above me.

- 8/14/2021 around 1:30AM – My alien friends showed me things about 20 times or so tonight. Mostly they would fly really fast and while moving they would fade-in with light and fade-out so it looked like a fast moving light; Most of the time it was dim; A few times it was nice and bright [It looks like a flaming piece of paper moving through the air; Sometimes it looks like a fast moving bright star]. This would happen about 50 feet up or so. A couple times they would turn-on a light way up where satellites would be while moving fading-in and out with light for a short while then fade-out the light. This is the most they have showed

themselves to me in one sitting. I was out there for about 1 hour 15 minutes [I would have come inside sooner but they kept showing me things. Most of the time I am outside for about 30 minutes or so a couple times a night usually between 10:00 PM and 4:00 AM; They seem to show me the most between 2:00AM and 5:00AM].

- 8/21/2021 around 4:15AM – A NEW ufo/alien experience I had since the past 5-years. Hold your thumb and index-finger 2 inches apart; Now hold them up towards the sky; Imagine an airline-jet at a height it would be 75% of that space between your two fingers [That's about how high this experience happened]. What I saw was a white-line [the width of the space between your two fingers] appear in the sky for 2-seconds and then disappear. This was the clearest night I ever experienced [Where I normally see 3 stars I saw 5 stars]. They also showed themselves 3-more times moving across the sky like a moving star, fading in and out while moving.

- 9/19/2021 around 5:15 AM – Many times I have asked my alien friends to please turn or do a circle because they are always doing something in a straight line. Tonight is the first time they did just that. About 50 feet above me a dim light that was fading in and out with light came down and did a big half circle above me. The size of the circle was probably 50 feet in diameter. And it was fast; Faster than a bird can fly.

- 05/04/2022 – My friend Perla from Mexico said she asked my alien friends to show her something in the sky, at first she didn't see anything, but then she said "I see a light go right then left." Perla said she didn't feel scared, she felt good. Perla was happy because finally she saw my alien friends in the sky. Here is exactly what Perla typed me in Facebook chat "i need said, the last nigh, i see sky and thinkkk where is the aliens, i no see ,,,,ohhhhhh i see in the sky a light go right and left. ohhh i said,,, i am friend limbrrg. hi you are welcome. yessss i happy because never i see. i think limborg is crazy jajajajja but no is real. i no feel scare. i fell good."

- June and July of 2022 I had owl experiences - I was on my deck looking at the stars and I asked my alien friends to see if they can bring an owl near me and make it make that whooting sound because many people who have experiences with aliens say owls were involved [seeing/hearing owls before/after they were taken/visited by aliens/extraterrestrials] so I wanted a similar experience seeing/hearing an owl. Then soon after for the first time I saw an owl in person at the park where I walk in nature [Spooner Park and Gervais Mill Park in Little

Canada, Minnesota]. A big owl flew onto a branch right above the asphalt path I was walking on and it just sat there looking at me; Then another owl flew over and sat on a different branch and I had two owls looking at me for 10 minutes and then I continued on my walk. I had many experiences after that. Those same owls visited me again at that same place several times. My friend Chang and my mom both said they believe the owls are guarding their nest; The very next day those owls stopped going to that location in Spooner Park and visited me at Gervais Mill Park. The last experience I had with those owls I was walking around a curve and I saw both owls on the asphalt path where I was about to walk 40 feet from me; As I got closer they flew into the woods, and then immediately turned around and one owl flew up onto a branch right above me and the other flew up on a branch above the asphalt path about 15 feet in front of me; And then the owl right above me looked right at me and for the first time, instead of making a wheezing sound as it always does... it made a WHO-WHO WHOOOOOOO~~~~~ sound [Two quick high-pitched who who sounds with a long whoooooo sound that had vibrato, a trill-sound at the end of it]; It kept looking at me making that whooting sound; It made that sound about 5 times; I said "Thank you for this experience. I am going to continue on my walk now." and as I walked backwards looking at it it whooted at me one more time. The other owl was making that wheezing sound [an air sound]. Then the owl experiences stopped because I was completely satisfied with that owl experience; I really enjoyed those experiences.

Dream Experiences:

- I asked my spirit guides to let me have a dream my parents dog would have; A few days later I woke up barking.
- I had a dream where I was headed up the stairs and I felt like something was holding me back; I turned around and charged into it and felt and heard a loud electrical shock and woke up. Most of my dreams are not this real; I didn't see anything but the sound was real.
- 1/13/2022 - I had my first Lucid Dream experience while sleeping. A DREAM is when you wake up and realize you were dreaming. A LUCID DREAM is when you become conscious and aware during the dream that you are dreaming. An ASTRAL PROJECTION EXPERIENCE is when you leave the dream and go off exploring fully conscious and aware that your physical body is sleeping while you are out of body exploring. I do not

remember ever having a Lucid Dream but today I had one. The dream experience felt as real as this human experience, I was in my car looking out the passenger window waiting for my brother to back his car out [I was going to follow him some place]; After he backed out I found my car in a different position turned 90 degrees to the right facing another car; I was confused; I found myself at a distance behind my car wondering how to get out of that spot; And then I saw the car I was driving was my old 1983 Pontiac Firebird S/E that I owned and drove for 20+ years; That's when I started to become LUCID [conscious and aware] that I must be dreaming because I sold that car many years ago; In that moment I thought it's hard to believe I Am dreaming because it feels so real here; And then I very quickly became conscious and aware being in bed sleeping and I woke up. Many people who become conscious and aware that they are dreaming [becoming Lucid in a dream] end up having an Astral Projection Experience [leaving the dream and going off exploring... visiting other places on Earth, other planets, meeting other people also having Astral Projection Experience while out of body, meeting aliens/extraterrestrials, deceased loved ones including pets, etc.].

Synchronicity Experiences:

- I was watching a video and the girl in the video said her girlfriend got silly putty in her hair sleeping on it; Then 3 days later my niece said her daughter got silly putty in her hair by sleeping on it.
- My neighbor was talking to me about how his relative always gets lots of snakes and that he has to set traps to get rid of them; Then a few days later my dad [who lives in a house attached to my house] said he saw a gardener snake going across his driveway [I've lived here 15 years and never seen or heard about any snakes; 3 days after my neighbor talking about snakes my dad sees a snake going across his driveway].
- I was driving to The Home Depot and saw a corvette thinking to myself how ugly the back-end of the corvette is; I accidentally turned off to go to Menards; I had to do a U turn to go back onto the highway to continue going to The Home Depot; I somehow missed the [White Bear Avenue] exit to go to The Home Depot; I ended up going to 694, taking that to White Bear Avenue, and finally arrived at The Home Depot. While driving home I merged onto the highway and already on the highway came the same corvette along my left side and passed me.

- 2018-07-23 Today I noticed the background-photo on my Original Music webpage has the same palm tree, location, and camera angle as the background-photo in my new YouTube Original Music video that is embedded at the top of my Original Music webpage.
- 01/18/2019 – Today I won \$100.00 at Publishers Clearing House [PCH.com, Top Scorer in Slots] and... I won this same prize last year on the very same-day [01/18/2018].
- 8/23/2020 – About a week ago my friend Dan Towle said his girlfriends name is Joe-Safeen. Then today my neighbor Janette said she rides her paddle-board on Joe-Safeen Lake. And she had to mention Joe-Safeen Lake several times because I was talking over her. It's like God was going to make sure I heard the word Joe-Safeen come out of her so I had this synchronicity experience.
- 6/2/2023 at 6:30 PM – I was playing tennis at Victoria West [Central Park in Roseville, Minnesota], I went to my car to put a tennis ball in my car and then started walking towards the tennis courts and realized I didn't put the tennis ball in my car but instead I put my tennis racket in my car; I went back to my car and got my tennis racket and put the tennis ball in my car; Then when I got on the tennis courts I realized I still had my wallet in my front left pocket so I went back to my car to put my wallet in my car [I put tennis balls in my left pocket and don't want my wallet in there as well]; I believe there are no coincidences and was wondering why I kept going back to my car; All those times going to my car I noticed two cases of CRUSH soda sitting on the back trunk of someone's car; I sung the song "I got a crush on you" by The JETS when I saw those cases of CRUSH soda sitting there; After putting my wallet in my car I asked a little boy if he wanted help lifting those two heavy cases of CRUSH soda; He said yes; I brought the two cases of CRUSH soda to his mom at a picnic table; I told her there was a famous band in the 1980's called the Jets and they had a song called "Crush On You"; She told me she was just at Walmart getting those cases of CRUSH soda pop and a girl there sang the song "Crush On You" to her when she saw those cases of CRUSH soda; At the time she didn't know what she meant [She never heard of the Jets or that song]. I believe Meikeli Wolfgramm [The Jets dad we all called Mike] created this spiritual/synchronicity experience for me because he passed away a couple years ago and I talk to him knowing he can hear me; The year he passed away I heard the Jets song playing at Cub Foods and I never heard their song there before; That was another synchronicity experience [The same year Mike passed away I

heard the Jets song at Cub Foods, and that happened twice within a month, not a coincidence]. When we go to sleep we all get together in spirit and create our human experiences; We are creating our human experiences together in spirit every time we sleep.

- 6/18/23 – Driving home from my parents house I saw 111 on something [I forget] and then I saw 222 on something [I was seeing these numbers mostly on phone numbers on signs along the road and perhaps license plates]; Then I asked God “Ok God, I saw 111 and 222, see if you can show me 333 before I get home.” I saw 555 next and then said “Ok, Now I need to see 333 and 444.” I saw 444 but no 333. However... the very next day [Fathers Day] when I went to the coffee machine for coffee the clock [which I never look at] said 3:33; And then soon after seeing that I realized “Ohhhhhhhh, I got my 333 I asked for.”

Other Spiritual Experiences:

- 9/19/2022 – Around 12:00pm I saw a squirrel in my back yard searching through my lawn for food. I went in my freezer and got my peanuts covered with dark chocolate that I made for myself and I threw a chunk of that out on the lawn; It landed about 3 feet from the squirrel; Within about 8 seconds it went towards it, picked it up, and started eating it. Then another squirrel came a few minutes after that. I went and got another piece for that squirrel; I opened the back window to toss it out at the squirrel; The squirrel was about 50 feet away; I tossed the chunk of dark-chocolate covered peanuts hoping it would get close to the squirrel and it bounced on the grass and landed directly under it's mouth; There are no coincidences; What are the odds it would land exactly where I wanted it 50 feet away; That was a miracle; I said “God, Thank you for that miracle.” And then when I was looking out the front window at my lawn the squirrel came into the front trying to find spots in my lawn to hide the food; It ended up jumping up on the first rail of my two rail fence and sat there looking straight at me while it continued eating the food I gave it. I enjoyed that experience.

Missing Time Story:

When I was about 9 years old I slept at my Grandparents house; I laid down in bed and closed my eyes; I wanted to open my eyes one more time before going to sleep; But when I opened my eyes the room was

bright from the sun coming through the window; It was already morning; I couldn't believe it. I literally felt like I never went to sleep yet; I was still tired and was mad because I was so tired and wanted to sleep. It literally felt like morning came in a blink of an eye. I may have been abducted by aliens.

My dreams are always about 5% real only; My mom and brother said their dreams feel 100% real; My dad said his dreams feel about 50% real.

End.
